The SteelMaster® Promise

Dear Customer:

SteelMaster represents over 24 years of premium quality manufacturing, providing the world's finest steel buildings and construction solutions. We have over 35,000 satisfied customers in North America, South America, Europe, Asia, and Africa, ranging from folks just like you, the government and the military to numerous Fortune 500 companies.

Our promise to you, our valued customer is to:

- partner with you to provide custom building solutions
- provide the best quality products in the business
- deliver unparalleled customer service
- the best warranty in the business
- offer a one time investment for a lifetime of use

We will accomplish this by keeping your needs at the forefront while maintaining the highest standards in our industry. This is the SteelMaster promise to you,

We look forward to earning your business,

- Only the finest grades of steel and materials
- SteelMaster provides the **WIDEST** building spans in the industry

A 16' to 70'W	S 10' to 100'W	Q 20' to 150'W	X 20' to 90'W	R 10' to 150'W	T 10' to 100'W
-------------------------	--------------------------	--------------------------	-------------------------	--------------------------	--------------------------

Garages & Carports

A SteelMaster building is the perfect solution for any backyard garage or storage building. The quick and easy construction makes it ideal for the “do-it-yourselfer”. The unique design of these buildings provides security and durability, while remaining aesthetically pleasing. By customizing the endwalls, a SteelMaster building can match your home and complement your surroundings while adding value to your property.

- Strongest in the Industry
- Quick & Easy Construction
- Durable

Workshops

Whether you are looking for the perfect woodworking or automotive shop, or just need a place for those weekend projects, the SteelMaster product line is the perfect solution. With 100% usable space, you have the flexibility to truly customize the inside of your workshop. With our unique system, you can easily hang lighting, run conduit, build shelving, add a loft, insulate and/or heat and cool your building.

• 100% Usable Space

• Multi-Purpose

• Accessory Options

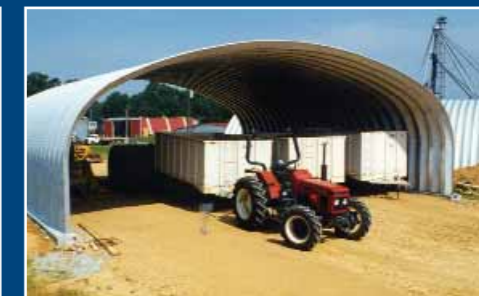

Agricultural & Bulk Storage

SteelMaster is the ultimate Agricultural and Bulk Storage building. It is perfect for protecting machinery, heavy equipment, hay, grain, and livestock, to name a few. One of the many features of a SteelMaster building are its 100% usable space. The unique clear span design eliminates the need for bulky interior beams, trusses and supports. SteelMaster's solid steel design and Galvalume Plus™ coating eliminates any concerns with rusting, rotting and unsafe frames, your building will be virtually maintenance free for years to come. And if at any time you find the need for additional space, your SteelMaster building is expandable without major construction hassle or expense.

• Expandable

• Maintenance Free

• 30 Year Warranty

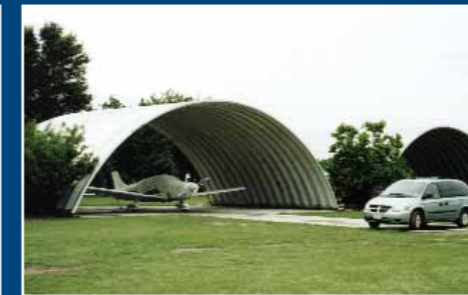

Aircraft Hangars

SteelMaster's clear span design is both economical and durable, making it world-renowned in the field of aviation. This unique design can span up to 150 feet wide, with unlimited lengths. With no need for interior supports, you can maximize the use of space. Whether you have a single, twin engine, or commercial jet, this unique design can accommodate your needs. The SteelMaster hangar is perfect as a portable/temporary structure on a grass landing strip or as a permanent structure on a private tarmac.

- World-Renowned Design
- Portable/Relocatable
- Weather Resistant

GM® HUMMER® Roofing System

Commercial & Industrial

The SteelMaster Commercial Department has provided solutions and designs in North America, South America, Europe, Asia, and Africa for many of the worlds largest companies. For example: General Motors®, Anheuser-Bush, Toyota, 3M, Cannon, Northrup Grumman, Norfolk Southern, and every branch of the United States Government, including NASA. SteelMaster prides itself on pushing the design envelope on a daily basis. The continual development of new technology, better materials and stronger steel provide increased versatility and maximum economy for each project. SteelMaster leverages our custom designing, needs-based selling and unparalleled customer service to exceed every customer's expectations. This relentless pursuit of perfection and creativity will continue to serve our SteelMaster customers now and in the future.

Cogi Farms, Riding Arena

Options - Endwalls

Standard Endwalls:

- Framed for Garage Doors
- Sliding Door System.
- Solid
- Open

Available Colors:

<u>Standard</u>	AZ 180 Galvalume Plus™ Dry clear organic coating with a 30 year warranty.
<u>Alternative</u>	white, tan, beige, blue, green and red. Available on select models only.

Available Doors:

Entrance, Overhead, Canister, Sliding and Bi-Fold. *Call for more details.

Options - “Do-It-Yourself” Endwalls

All SteelMaster endwalls are non-load bearing, giving you the option to custom design and build your own endwall using local materials. Many clients choose this option to give their buildings that custom look. It's both easy and inexpensive.

Brick Endwall

Vinyl Endwall

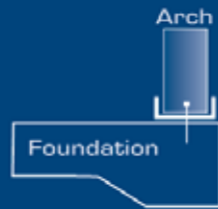

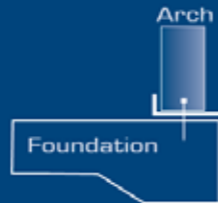

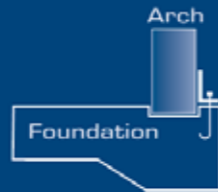

Wood Endwall

Options - Foundations

The SteelMaster building can easily attach to existing foundations, concrete and or block walls. Whether your building needs to be portable or permanently positioned, we have the solution.

- Keyway (Standard)
- Industrial Base Connector
- C-Channel Connector

Foundation Bolts: Anchor / J-Bolts
Wedge Anchors / Expansion Bolts

Options - Vents

Turbines - This type of vent will significantly reduce the temperature within your building by extracting stagnant hot air. It also helps in controlling moisture build-up.

Louver Vents - These vents are used to allow air into your building, helping improve cross ventilation and reduce condensation.

Exhaust Fans - These fans are designed to maximize the air flow throughout your building, regulating the inside temperature and reducing condensation.

Do - it - Yourself

SteelMaster Building components are made to precise standards of accuracy for easy assembly with pre-drilled holes and one size nuts and bolts to fit the entire building. When delivered the prefabricated kit is so simple to erect that most of our customers construct their own building, resulting in huge savings!

Step 1:
Build Your Arches — Putting up your SteelMaster building is safe and easy, with one-size nuts & bolts, enables you to get 70% of the work done on the ground before erection.

Step 2:
Raise Arches — In most cases, no heavy equipment is required when raising the building, just a few helpful hands.

Step 3:
Fit Arches Together — Our precision-built arches fit together perfectly. The Precision overlap of the arches provides more steel at critical connections, ensuring the easiest-to-assemble, strongest arch system available.

Step 4:
Add End Walls — Finish your building with any SteelMaster steel End Wall, or a custom End Wall that you create yourself.
