## SteelMaster Celebrates 28th Anniversary

Throughout the past 28 years time has moved forward bringing with it exciting changes for America and the world. The same holds true for SteelMaster Buildings, which celebrates its 28th anniversary this month.

SteelMaster, which is based in Virginia Beach, VA, distributes prefabricated steel and metal buildings and to date has amassed many thousands of satisfied customers worldwide with buildings located in every state in the United States, on six continents, and in more than 40 overseas countries.

## A Building to Live, Work and Dream In

If slow and steady wins the race, then the Cochran men of Arley, Ala. are champions of woodworking, meticulously crafting wood furniture from salvaged trees acquired at national forests in South Alabama and Florida.

When it came time to build a woodworking shop and home for Dylan Cochran, part owner of Wood Studio, he and his brother Keith and father Randy chose an arched steel structure that fit their criteria as artisans. The result is a haven for the family to live, work, and dream in together. [Read More >>>](#)

## NEW Shelving and Storage System

Once again, SteelMaster revolutionizes the steel building marketplace!

We are excited to announce a brand new industrial strength shelving system engineered to our highest quality standards. Unlike shelving systems available from retail stores, the SteelMaster shelving system is uniquely customized to conform to the size and shape of your SteelMaster corrugated pre-engineered building which maximizes the space for your workstation. Built with 14-gauge steel, our new system provides industrial strength shelving and storage options for your SteelMaster building. [Learn More >>>](#)

## Steel Protects History on Wheels

When it came to housing and protecting George "Wayne" Trent's six antique cars and trucks, it was time to put the pedal to the metal. After he moved to Hudson, FL into a home with only a three car garage, he set out to find a suitable building for his prized possessions.

"I wanted a garage that would not blow away in the Florida weather, and I needed it tall enough to put in a car lift so I could work on my old cars," says Trent. "I picked the round steel type because there is no roof to get blown off, which is what always happens in a bad storm—and then the walls fall in. I have a four-post lift in the left bay, and I park my 1959 Ford fire truck on the lift and then run it up all the way and park my 1950 Plymouth underneath. In the right bay, I park my 1953 Ford C-500 truck." [Read More >>>](#)

We would love to feature your building on our blog! If you have a story to tell and pictures to share, please email them to [eanderson@steelmasterusa.com](mailto:eanderson@steelmasterusa.com).
